PRODUCT DESCRIPTION

The GL-Core S was specifically designed for one of the best Israeli Counter-Terrorism units, to be used as a primary buttstock. The GL-Core **S CP** version includes the GL-Core S stock and the GCCP Cheek Rest, designed to support the use of different optics and holographic sights on the AK and VZ platforms.

The design process started with the GL-Core buttstock, and implemented all the design changes that were requested to create a buttstock that will be short and compact for CQB scenarios but will still provide strength and stability for mid-range engagements.

Advantages:

- Small and compact allowing for easy maneuverability during CQB
- Flat faced rubberized butt-pad designed for use with and without tactical body armor
- Interchangeable buffer tube adapters for a tight fit on **Mil-Spec** and **Commercial** buffer tubes
- GCCP- Three positions Cheek Rest
- No protruding parts, will not get caught on gear or webbing
- Inversed positioning lever will not open accidentally
- Two integrated quick detach rear sling swivel connectors
- Made of durable and light-weight fiberglass reinforced polymer composite
- Available in Matte Black, Olive Drab Green or Flat Dark Earth

Compatibility:

AK, VZ and shotgun platforms, on the AR platform, the CP may obstruct the use of the charging handle when the buttstock is fully collapsed, for use with an AR platform, we recommend removing the CP
